

Vulnerability Scan Report

Target: 192.168.29.1

Port: 21
State: filtered
Service: ftp
Version:
Risk Level: No Risk

Port: 22
State: filtered
Service: ssh
Version:
Risk Level: No Risk

Port: 23
State: filtered
Service: telnet
Version:
Risk Level: No Risk

Port: 25
State: filtered
Service: smtp
Version:
Risk Level: No Risk

Port: 53
State: open
Service: domain
Version: 2.45
Risk Level: Low

Why dangerous: Open ports increase the attack surface of the system.
Recommendation: Close unnecessary services and restrict access.

Port: 80
State: open
Service: http
Version:
Risk Level: Low

Why dangerous: HTTP traffic is unencrypted and vulnerable to interception.
Recommendation: Redirect users to HTTPS.

Port: 110
State: filtered
Service: pop3
Version:
Risk Level: No Risk

Port: 143
State: filtered
Service: imap
Version:
Risk Level: No Risk

Port: 443
State: open
Service: http
Version:
Risk Level: Low

Why dangerous: HTTPS services may expose web vulnerabilities if misconfigured.
Recommendation: Keep web applications updated and use strong TLS settings.

Port: 3306
State: filtered
Service: mysql
Version:
Risk Level: No Risk

Port: 3389
State: filtered
Service: ms-wbt-server
Version:
Risk Level: No Risk
